

POWER

Prediction Of Worldwide Energy Resources Project

Scan to access NASA POWER
data, tools, and resources

*NASA Earth observations, modeling,
and analysis to enable actionable
decisions, accelerate learning, and
improve outcomes in order to support
the planning, construction, and
sustainment of the built environment.*

Assisting in Resilient Building Transformation

Utilize infrastructure data at no cost

Encourages building energy efficiency, resiliency, and continuity

Increases accessibility for energy and infrastructure decisions

Provides opportunities for data driven education and research

Bridges data gaps for underserved geographic regions worldwide
